PROJECTS

Food Delivery Application (Mobile & Web)

A cross-platform food delivery application built with Flutter (mobile) and React (web), allowing users to browse menus, place food orders, and track deliveries, with web-based order and menu management.

Technologies: Flutter, Firebase, React, Node.js, CSS
Live URL: https://food-delivery-uph5.vercel.app/

Dynamic Customer-Focused News Platform

A modern, responsive news website delivering the latest news, articles, and updates. Users can browse news by category, search for specific topics, and read full articles. Includes features like featured news sections, image galleries, and a user-friendly navigation menu.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

Evenet Manegement & Ticket Booking System

Developed a web-based system that allows users to browse events, book tickets, and manage bookings online. Implemented MVC architecture using Spring Boot with database integration for event and ticket management. Included admin features for event creation, updates, and ticket monitoring..

Technologies: Java, Spring Boot, Spring MVC, MySQL, HTML, CSS, JavaScript, Git

Zonzoctech – Company Website

Designed and developed the official website for Zonzoctech, focusing on a clean, responsive UI and clear service presentation. Implemented modern layouts, optimized performance, and ensured cross-device compatibility.

Technologies: React, Node.js, MongoDB, CSS3,
Live URL: https://www.zonzoctech.com

Interactive Math Tuition Portal

A dynamic web platform for promoting tuition classes. Features include class schedules, course descriptions, teacher profiles, and a contact form for student enrollment. The website provides an interactive interface for students and parents to explore courses and engage with tutors.

Technologies: HTML, CSS, JavaScript, PHP, Bootstrap
